

Flash Feet

INTERNATIONAL LIMITED

**Remedials & Reprocessing
for the Retail Industry**

FOOTWEAR, CLOTHING, HOUSEHOLD GOODS & GIFTWARE

Established in 1994 by experienced footwear manufacturing professionals, Flash Feet International has won an enviable reputation as a specialist footwear remedials company.

Serving the needs of retail distributors and importers to the UK market, Flash Feet is the chosen reprocessing supplier for a growing number of High Street brands.

Our experience and knowledge of the required standards and processes of the footwear industry has enabled us to provide essential skills and quality control expertise. We have built on our capabilities by acquiring specialist machinery to handle delicate and intricate reworking operations which enable us to overcome imperfections, rework damaged or sub-standard goods, and save our customers valuable time and money.

A fast and efficient remedials and reprocessing service for importers and retail distributors

In response to our customers' demands, our specialist footwear service has expanded to meet the needs of the general retail sector, and we now provide many reprocessing services covering clothing, general household goods and giftware.

Our established principles of fast, efficient service and first class attention to detail remain unchanged.

With premises in the East Midlands, at the heart of the UK's retail distribution network, we can offer fast turnaround, speedy collection and delivery, and maximum cost savings.

We are an expanding company with excellent facilities and can offer a wide range of specialist services. The competitive retail sector demands the best in performance, packaging and presentation, and we are here to help ensure that your product succeeds in all of those areas. Your success is our future.

Refinishing, Spraying, Reforming

For footwear products that have been damaged in transit or in storage, or that have not been finished to required standards, we can overcome discolouration or moisture marks with dying, respraying or refinishing of uppers. We can also offer top piece stapling, gluing, heel nailing, socking and topline quarter reforming.

Debranding & Rebranding

We are able to debrand stock clearance lines and unwanted goods with minimum impact, unstitching labels, removing tags, and using specialist processes to remove foil and ink markings. We will also undertake rebranding, relabelling and repackaging as required.

Stitching, Eyeletting & Rivetting

With our own specialist footwear machinery and teams of skilled operatives we can stitch, make good, repair or replace sub-standard or damaged footwear components, bringing products up to required standards of the UK retail market. We are also able to advise on recommended procedures using our own manufacturing knowledge and experience.

Barcoding, Labelling & Kimballing

We handle bar coding, affixing of labels and tags, kimballing and applying promotional stickers. Our service covers footwear, clothing, giftware and various forms of general household goods. Products can be supplied to us individually packaged or bulk packed.

Spot Checking & 100% Inspections

With dedicated teams of reliable and experienced staff we will undertake 100% inspections, detailed examination of individual manufacturing or finishing processes, and percentage spot checks. We can supply you with an itemised inventory of garments examined as well as individually marking faulty and damaged products.

Repacking, Sorting & Cleaning

If your imported goods need processing before they reach the retailer we can take care of sorting, sizing, break bulk, scale-outs, cleaning and repacking in preparation for distribution. Our staff are fast, efficient, well trained and meticulous in their attention to detail.

On Site Working

To save you time and transport costs we can arrange to send our own teams to work on site in your warehouse, carrying out reprocessing operations. Our supervised operatives frequently perform better than agency workers or even regular employees.

Transport & Booking In

We can arrange delivery and collection from and to your warehouse as required. We can also arrange to take receipt direct from your customs clearance agents and take control of booking in, reprocessing and delivery direct to your customers.

Clearance Lines

With our own network of clearance goods customers we can arrange for cost effective disposal of clearance line ranges and unsold products. All items can be debranded, relabelled and repackaged before sale.

Located in the heartland of the UK's retail distribution network with fast and easy access to customers and suppliers nationwide.
